

FUND INVESTMENT APPROACH

1. Find asymmetric themes
2. Invest in the best stocks within those themes
3. Focus on macro drivers for risks and opportunities
4. To generate an asymmetric return profile

The strategy is global long/short equity with a variable delta bias. The portfolio will typically contain 40 to 70 positions. The fund focuses on identifying underinvested global investment themes through extensive macroeconomic and thematic research and then utilises a bottom up fundamental process to identify the highest quality securities within an investment theme to deliver asymmetric returns for investors.
