

COMMENTARY

EXPOSURES and ATTRIBUTION

Overall net exposure was maintained mostly within 20% net long to 20% net short.

The largest gains were in High PE shorts, Credit risk shorts and NTA/Breakup and Agriculture longs. The largest losses were from Infrastructure spend longs and Early stage healthcare.

PORTFOLIO OPPORTUNITIES

There was little change in the composition during the month.

There are a number of early stage themes being researched which if found to meet risk reward criteria, will be implemented during the next few months.

PORTFOLIO RISKS

The fund is long commodity exposure and hence long inflation and short bond proxy themes.

STRATEGY SUMMARY

The investment process involves three stages:

1. Themes are identified as investment opportunities
2. Valuation screens are run to find stock opportunities within the theme
3. Market dynamics are assessed to determine entry timing

The strategy is long / short equity with a variable delta bias. The universe is global equities with a focus on Australia. The portfolio will typically contain 40 to 70 position. Global futures and options are also actively traded from time to time.

The strategy aims to identify trends and opportunities using value investing principles and capture price oscillations around the underlying trend using trading skills.
